PROFESSIONAL SUMMARY

Mid-level Front-End Engineer specializing in high-performance web applications across the React.js, Next.js, and Vue.js ecosystems. Proven track record of reducing interface load times by 70%, achieving perfect (100) Google Lighthouse scores, and ensuring system reliability with over 90% test coverage. Leverages a strong Full-Stack background (PHP/Laravel, Docker) to architect secure Single Sign-On (SSO) integrations, mitigate OWASP vulnerabilities, and accelerate delivery cycles using AI-assisted workflows (SDD).

TECHNICAL SKILLS

- **Front-End & UI:** React.js, Next.js, Vue.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Framer Motion, HTML5/CSS3.
- **Architecture & Quality:** Web Vitals (Performance Optimization), Clean Code, Unit & E2E Testing (Jest, Cypress), OWASP Security Standards, Single Sign-On (SSO).
- **Back-End & Data:** PHP, Laravel, RESTful APIs, SQL (PostgreSQL, MySQL, MariaDB).
- **DevOps & Tools:** Docker, Portainer, NGINX, CI/CD Pipelines, Git, Figma, AI-Assisted Workflows (Spec-Driven Development).
- **Languages:** English (Professional Working Proficiency), Portuguese (Native).

PROFESSIONAL EXPERIENCE

Rede Notre Dame | Passo Fundo, BR **Mid-level Front-End & Full-Stack Developer |** August 2025 – Present

- Spearheaded the front-end architecture for mission-critical web and mobile systems utilizing Vue.js, Laravel, and Flutter.
- Achieved and maintained a perfect 100 score on Google Lighthouse (Performance/SEO) and ensured system reliability by establishing automated testing protocols with over 90% coverage.
- Architected a Single Sign-On (SSO) Identity Provider (IdP), implementing robust front-end security and mitigating OWASP vulnerabilities via a dedicated NGINX reverse proxy.
- Standardized local and production environments using a Docker-first infrastructure, optimizing CI/CD pipelines and multi-stage builds managed via Portainer.

Veplex Sistemas de Informação LTDA. | *Passo Fundo, BR* ***Front-End / Full-Stack Developer*** | *February 2025 – July 2025*

- Executed a complete UI/UX restructuring and responsive design implementation, seamlessly integrating React.js and Vue.js front-ends into a Laravel ecosystem.
- Engineered complex Business Intelligence (BI) dashboards from high-fidelity Figma prototypes, optimizing data rendering performance for logistics operations.
- Accelerated delivery cycles and enhanced code maintainability by integrating Artificial Intelligence tools into daily pair-programming workflows (Spec-Driven Development).

Sinapsys | *Passo Fundo, BR* ***Front-End & Mobile Developer*** | *October 2024 – January 2025*

- Developed cross-platform mobile applications using Flutter, translating complex corporate UI/UX requirements into fluid, user-centric interfaces.
- Supported legacy ASP.NET backend ecosystems while optimizing relational database performance through advanced SQL queries, structural triggers, and indexing.

IM9 Inteligência em Mobilidade | *Passo Fundo, BR* ***Front-End Developer*** | *May 2023 – June 2024*

- Collaborated within the engineering team to refactor legacy React.js applications, implementing advanced code splitting and asset optimization that resulted in a proven 70% reduction in interface load times.
- Developed real-time telemetry dashboards utilizing Server-Sent Events (SSE), architecting client-side buffering and data sanitization in vanilla JavaScript to handle massive data flows without blocking the main thread.
- Translated business rules into high-fidelity UI prototypes (Figma) and supported the Dockerization of the front-end ecosystem.

EDUCATION

Degree in Systems Analysis and Development (ADS) University of Passo Fundo (UPF) | *Expected Graduation: 2026*
